

The **RAMBLER**

Main Level 1536 square footage
2 Bedrooms, 2 Bathrooms
Unfinished Basement 1436 square footage

The Arts and Crafts Movement brought forth a more stream-lined simplified lifestyle. Artisans and craftsmen began to leave behind ornate detail and enforce the concept of utility in their work. Thus, American-made products such as “mission style furniture” were born. The rambler comprises simplicity with all necessary living space on one main level. The lower level offers additional resources, such as guestrooms, storage space and other modern amenities such as home exercise rooms, and theatres which have been adapted into our lives over the last several years.
